## [Quality Policy]

To ensure the quality and safety of our work in every project through continuous training, the use of internationally recognized brands, and the application of international HVAC standards.

# [About Us]

Reaclima is a company specialized in the design, supply, and installation of HVAC and Liquid Cooling systems for large-scale and complex projects.

With over **50 years of experience** and a team of expert engineers and technicians, we deliver efficient and reliable comprehensive solutions supported by world-class brands.

# [ Brands We Have Worked With. ]

04

# [ Our Clients ]

## Mission

To create spaces that enhance comfort and productivity.

## Vision

To become the #1 partner for large-scale HVAC projects.

## Strategy and Values

We build strong partnerships with suppliers and business partners to always deliver the best solutions in quality and performance catering to each client's needs, operating with integrity and transparency.

Q5

# Services

[Engineering and Installation of:]

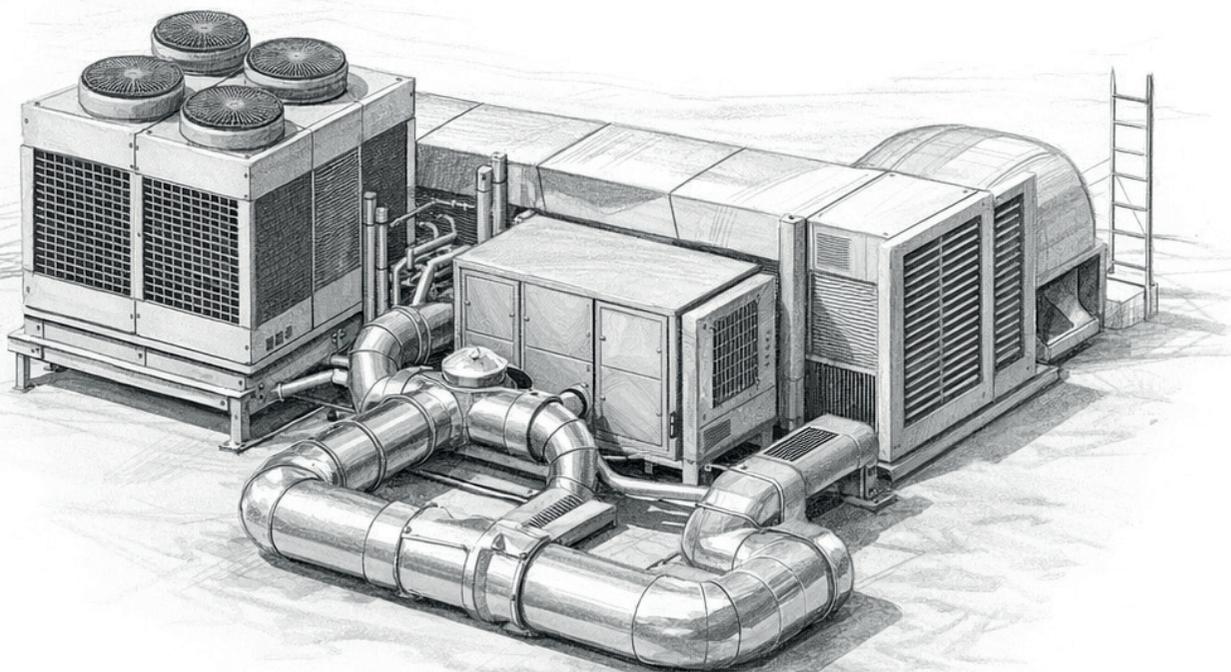

Direct Expansion (DX) Air Conditioning Systems.

Variable Refrigerant Flow (VRF) Systems.

Evaporative Cooling Systems with Cooling Towers.

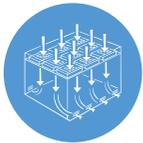

Chilled Water plants & Liquid Cooling Systems.

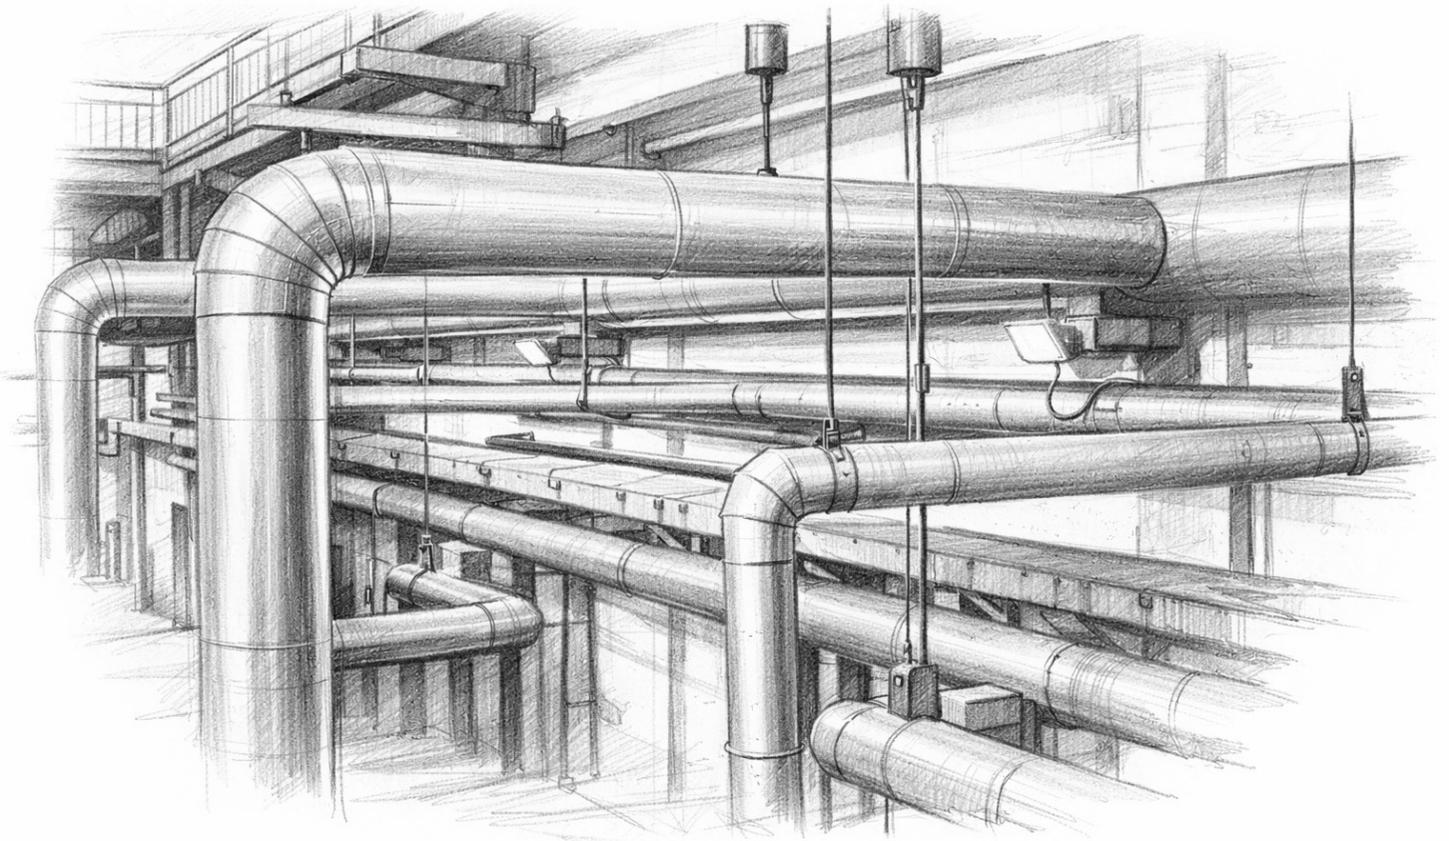

Ventilation and Exhaust Systems.

Clean Rooms with Temperature and Humidity Control.

Equipment Handling and Assembly.

# Benefits

[ Our approach combines engineering expertise with operational, technical, and financial capabilities to ensure successful HVAC project execution. ]

## Reliable Execution

We meet deadlines, project scope, and delivery goals without improvisation. Certified welding crews and large-scale ductwork teams. Design adjustments, corrections and value propositions.

## Operational Capacity

Lifting equipment and specialized transportation for large-scale project execution.

## Comprehensive Engineering

And optimization for complex, large-scale projects.

## Performance Guarantee

Testing, balancing, and documented commissioning in compliance with industrial standards.

## Contractor Partnership

We coordinate with civil work, electrical, and other discipline to avoid delays and rework through the use and implementation of BIM technology.

## Nationwide Coverage

We serve projects throughout Mexico with operational base in Nuevo León, Saltillo, Chihuahua, Nayarit, Jalisco, Querétaro, and Sonora.

# Value Proposition

We help our clients transform complex designs into reliable, efficient, and fully operational HVAC systems, ready to support 24/7 operations in critical process and comfort environments.
